Aureon

Questions for Brian?

Why are we still talking about this?

More and more buyers are automating

The biggest fallout is coming from our ownership's rural areas

Properly showing your fiber:

Load your owned fiber, IRU fiber, and owners' files in different KMZs
Color code appropriately

Properly showing your buildings:

Work with ConnectBase to load your existing On-net buildings
On-Net/Connected
On-Net-Limited Access/Connected
On-Net/In Progress

Properly showing your owners' buildings:

Owners have their own instance & they subquote
Owners have subscription that only does Near-Net and shares with you

INDATEL Member must have CPQ

Publish directly into the building list

Use either a custom pricing zone or a custom field to notate which owner

Best Practices:

**Pricing Zones: Simpler
is Better!**

**On-Net MRC/NRC &
Near-Net MRC/NRC**

2-3 Tiers by Zip Code

**If you have CPQ and
do Subquoting, all you
need to do is add
margin percentage or
dollar amount**

Use ROW Distance vs Line of Sight

Base the start of your distance off of your access points vs your fiber
Use existing splice points and slack locations you are comfortable splicing into

Use OSP data to develop cost zones
Create a KMZ or shape file if possible

Near Net Methodology:

Determine your CapEx risk

Determine your build distance based off your cost zones

Determine your exclusion list

Railroads

Rivers

Creeks

**Markets you
can't build in**

CSM Calls

Weekly until your instance is up-and-running like you want it

At least monthly

Don't be afraid to ask questions or make complaints

Keeping your buildings updated

Aureon's cadence

Buildings API

Buyers lose trust when you NO BID or rebid a site that is on your OnNet/NearNet list

Start with a risk you are comfortable with and grow

Questions for Barry?

INDATEL – ConnectBase History

Quote Volume by Sites 2024

Sites Queried this year: ~144,000

93% queried in ConnectBase

ConnectBase queries were
33% successful

INDATEL's manual quote
volume accounts for only 7%

Services Quoted in 2024

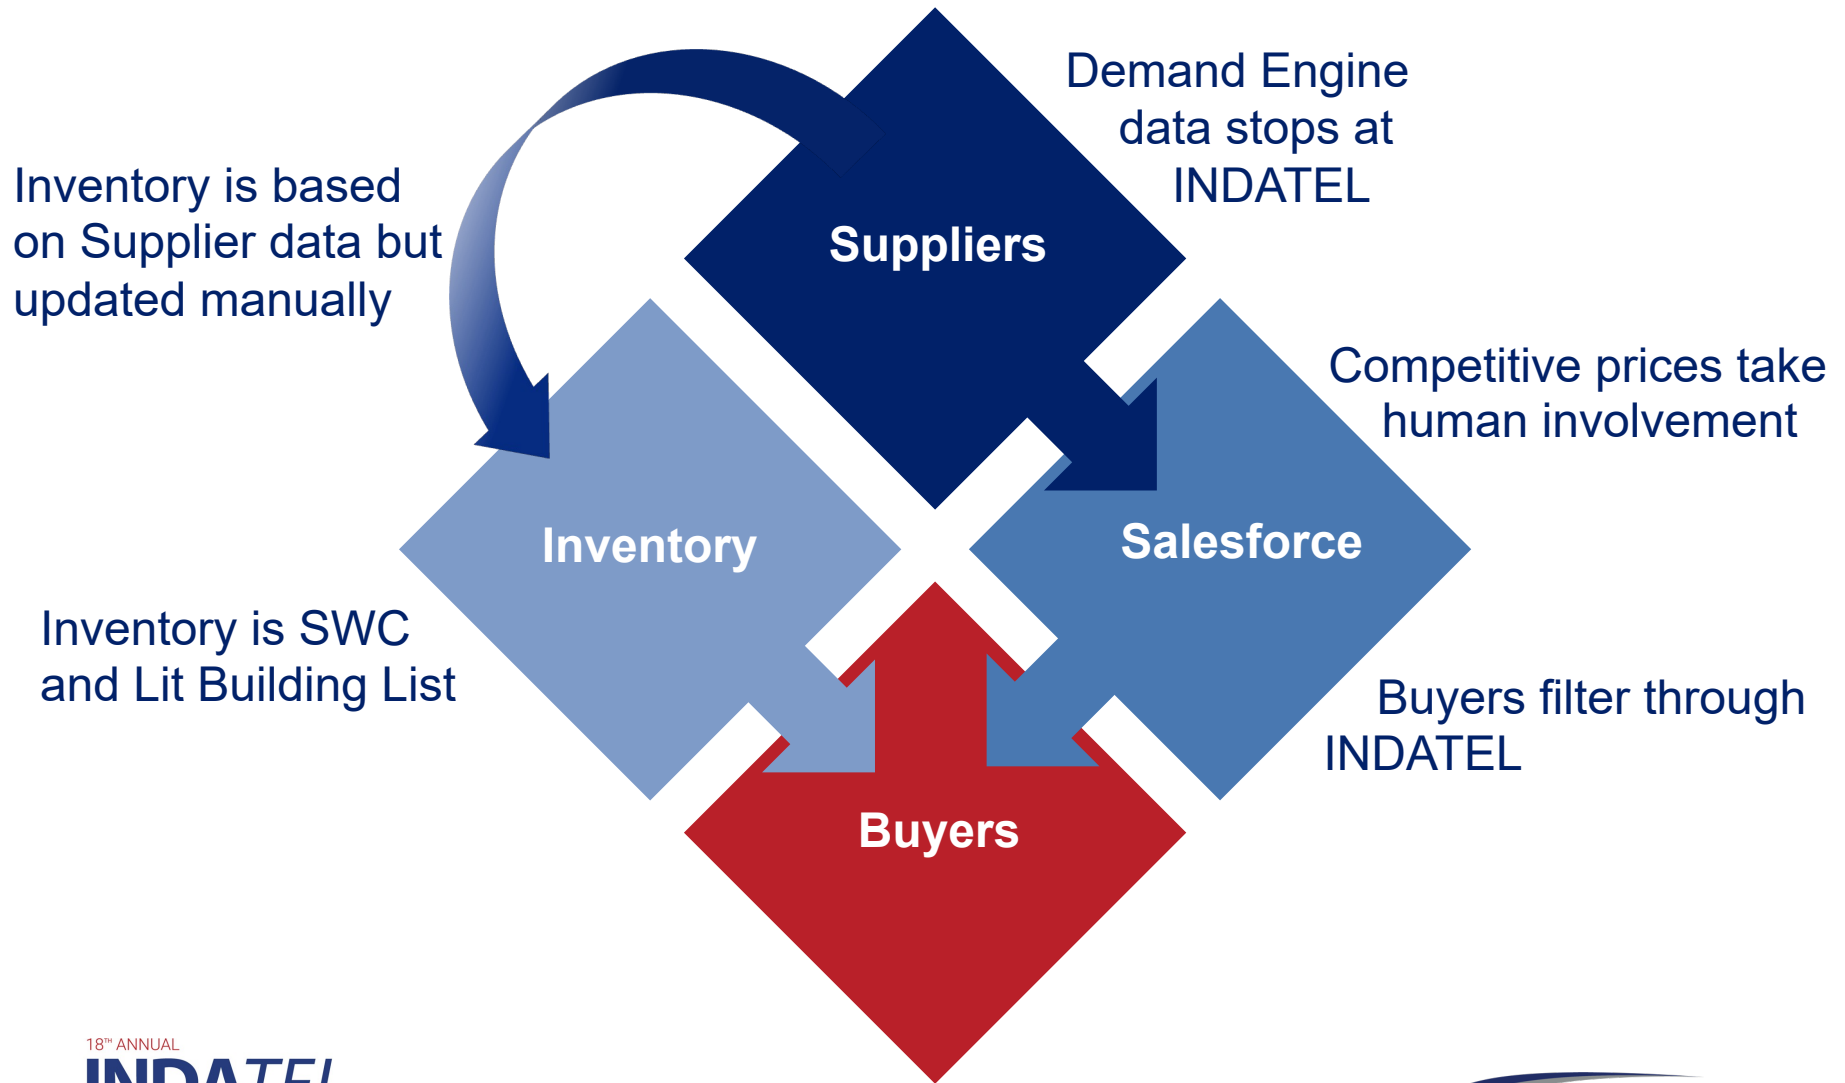

43% Direct Internet Access

34% Switched Ethernet

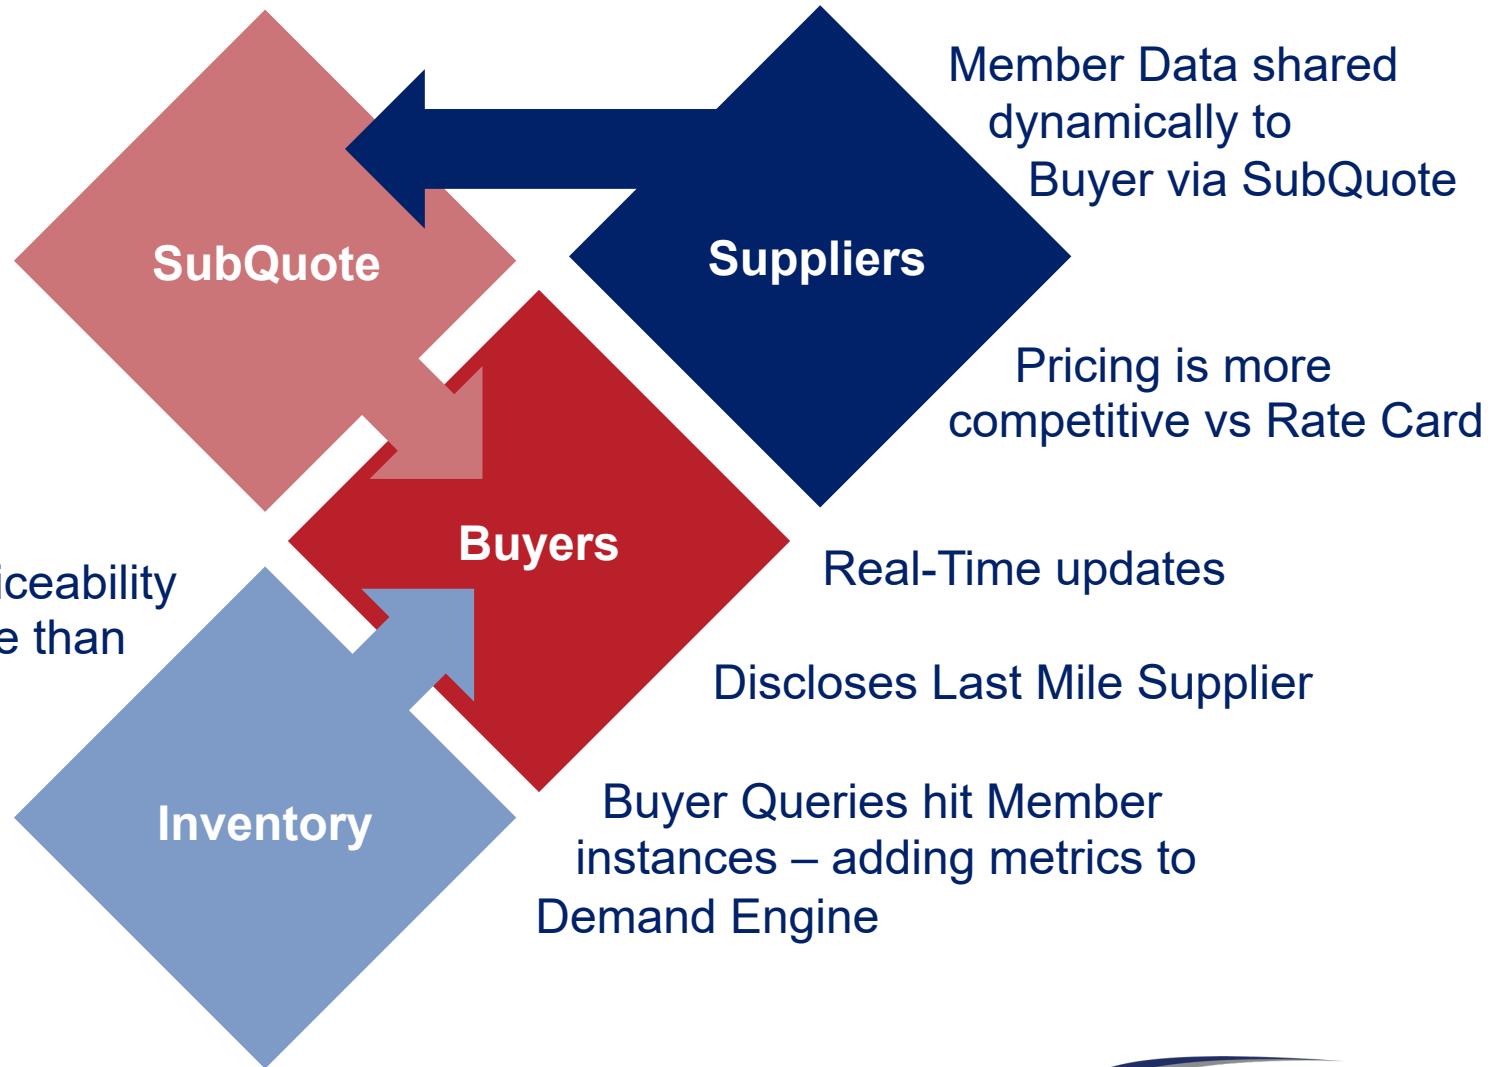

21% Broadband

< 1% Everything Else

How INDATEL Quotes Today

Future Quoting

Ben Weaver

Director of Carrier Solutions
Syringa Networks

Questions for Ben?

Year 1 Update

Initial onboarding completed

Dedicated Internet and Ethernet Products

On-net list with pricing tables

Near-net analysis completed

Near-net pricing tables for 500ft and 750ft

26 buyer prospects

14 seller/supplier prospects

Year 1 Performance

2023

VS

2024

130.95% Increase in
Successful Quotes

Year 2 Goal

GOAL: To onboard and integrate 12 members

Each instance

- Co-managed by Syringa
- On-net list with pricing tables
- Near-net analysis with pricing tables
- Products include DIA, Ethernet, and Broadband

Challenges:

Pricing tables include NECA

Visibility of network/vault maps

Management and automation

Looking to the Future

Deeper data analysis options for Syringa and Member/Owners

Automation Steps for quoting to ordering

Automation for updating on-net lists, and AI analysis of maps

Process creation for update frequency and pricing reviews
