

# POWERING CRITICAL OPERATIONS

*FROM FIELD TO FACILITY...*

From wellheads and pipelines to refineries, substations, and wind farms - INDATEL delivers scalable, enterprise-grade connectivity that powers America's energy infrastructure. With over 500,000 miles of diverse fiber and growing, INDATEL ensures secure, resilient connectivity in the most remote and challenging environments.

## *The Challenge*

Remote sites, extreme environments - limited connectivity options

Complex multi-vendor management across critical assets

OT/IT security and compliance requirements

Lack of real-time operational visibility

Inconsistent monitoring and oversight across multiple regions

## *The INDATEL Solution*

Rural-ready fiber and flexible connectivity solutions layered with local expertise

One agreement, one point of contact, 24/7/365 support

Secure network segmentation and auditable SLAs

Low-latency data transport enabling consistent, secure, real-time monitoring

Unified, managed connectivity linking all operational processes

---

500,000+ fiber route miles | 900+ independent providers | ONE Agreement
