

# CONNECTING MANUFACTURING OPERATIONS

## FROM FARM TO FACTORY...

Reliable 24/7 production environments require connectivity you can always count on. INDATEL delivers scalable, enterprise-grade connectivity nationwide from food processing facilities to advanced manufacturing plants. With over 500,000 miles of diverse fiber, INDATEL ensures consistent, secure connections across rural and remote manufacturing locations.

### ***The Challenge***

Downtime impacting production with unexpected outages

Complex multi-vendor management across multiple plants

IT/OT security and compliance requirements

Lack of real-time visibility across facilities

Limited infrastructure for automation and IoT

### ***The INDATEL Solution***

Rural-ready fiber and flexible connectivity solutions layered with local expertise

One agreement, one point of contact, 24/7/365 support

Secure network segmentation and auditable SLAs

Low-latency data transport enabling real-time analytics

Scalable bandwidth supporting Industry 4.0 initiatives

---

500,000+ fiber route miles | 900+ independent providers | ONE Agreement
